

*Application No.* 09/765,098  
*Applicant:* CLARY, Michael  
*Art Unit:* 3636  
*Examiner:* Stephen A. Vu  
*Page* 2

frame portions having two chamfered ends, and a pair of generally L-shaped connectors adapted for a telescopic fit ~~over~~ into the chamfered ends of said frame portions to form a rigid generally L-shaped frame, and all of said U-shaped frame portions and L-shaped connectors being Zinc plated for ease of assembly;

cont.  
C!  
a removable cover formed to fit over the frame and to hold said knockdown frame in assembly, said cover including a top panel section sewn against a bottom panel section, a side panel section sewn there between, and a cushion enclosed there between, said cover being insertable over said frame and swingable relative to the frame;

whereby said chair may be assembled and positioned on a surface in one of a first position in which the seat portion of the frame rests flat with the backrest portion extending upward to provide a backrest, said cushion extending forwardly from the frame to provide a seat, and a second position said chair being adapted to be overturned from said first position to a second position in which the seat portion of the frame extends upwardly and the backrest portion slopes downwardly with the cushion resting thereon to present a reclining surface.

2. (cancelled)

3. (withdrawn) The articulating chair according to claim 1, wherein at least one of said generally U-shaped frame portions are provided with a spring-loaded joint.
